Subject: Data request re SM Deployment

Hello:

This data request has been prepared on behalf of the ALJ Division.

Please provide the following data in connection with your smart meter deployment. If the requested data item does not exist or difficult to develop, please provide some reasonable substitute.

1. How many smart meters have been deployed and operational for billing purposes to date, for each major customer class or group (for example: large C&I, medium, SMB, residential, CARE, or some alternative custome breakdown if the suggested example is not available).
2. How many total smart meters will eventually be deployed for each customer class noted above.
3. When will each of the above customer class or group be fully deployed and operational for billing purposes (month/year estimate)?
4. Is the end-date provided in #3 above the same as originally planned in your respective AMI business case that were approved by CPUC (assuming the business case was broken down by customer class). If not, provide the original target date for each customer class.

Please let me know if we need to discuss the request further for clarifications. Thanks.

Alope Gupta
