Hi, Meredith,

Thanks for the info re- SVTC.

Re- the AL template, I guess its kind of up to Edison if they want to participate. To the extent they end up filing renewable QF advice letters, we will be using an AL Template that is likely to be largely shaped by what PG&E proposes and staff feedback. If Edison is ok with not being involved in that process, that's their call, they should just be aware that once we develop the template, they will be expected to adhere to it in whatever renewable QF filings they make.

Thanks and have good trip to DC.

Andy

Hi Andy,

Not yet. They are still working on whether they can revise their business plan. I will let you know as soon as we have new information.

On the biomass QFs, I checked with our guys and SCE only has about 3 contracts and we've heard that they may require them to bid in RPS RFO. Given the much lower volumes for SCE and their different situation, at this point, I don't think it will be productive to include SCE in creating the template. I will confirm with Brian when he returns. Should we wait to schedule a meeting until you are back in the office?

Have a great trip! I had hoped to go but need to be in DC through tomorrow.

Thanks,
Meredith

Subject: SVTC

Hi, Meredith,

Any more word from the SVTC folks re- feasibility of moving forward given the size of the award from DOE?

Thanks,

Andrew Schwartz
