Subject: CONFIDENTIAL MATERIAL -- Sempra Mesquite

Sean/Jason:

Attached is the latest update for Sempra Mesquite. I have provided you with two documents, a clean version that highlights all of the confidential redactions and a redline version that shows you what has changed since the last update. Also, Sandy mentioned that you had one additional follow up question as well. The answer is provided below:

Q: Does the contract include a no-fault termination or other similar conditions precedent if Sempra doesn't receive their preferred interconnection solution?

A. No. The contract requires Sempra to have a PGA or pseudo-PGA to ensure that the project qualifies as a bundled in-state resource. The contract does not allow Sempra to terminate if the preferred interconnection solution is not granted by the CAISO.
