Subject: RE: Energy Division Data Request_Distributed Solar PV Cost-Benefit Analysis and Interconnection Information

David and Hannon,

Energy Division Staff want to meet with PG&E and SDG&E to discuss the data request at the soonest opportunity. Any chance you are available tomorrow afternoon between 3:30-4:30? While it's short notice, I am hoping that given the Rule 21 workshop is tomorrow and is scheduled to end at 3:00 pm, that some of the right people will be available. There will also be a call in number available. Staff is already planning to meet with SCE at this time, and meeting collectively may be beneficial to all involved. To the extent there are any sensitive utility-specific issues to discuss we can follow up individually. Please let me know at your earliest convenience and I will forward the invite.

Regards,

Sean

Subject: Energy Division Data Request_Distributed Solar PV Cost-Benefit Analysis and Interconnection Information

Pacific Gas and Electric Company, Southern California Edison Company and San Diego Gas & Electric Company:

Please see the attached Data Request from the Director of Energy Division. Energy Division is beginning work to develop a detailed cost-benefit analysis for distributed solar photovoltaic (PV) systems, up to 20 megawatts (MW), that interconnect to the utility distribution system. In addition, the staff will assess the potential, in MW, of solar PV that can be readily interconnected to the utility distribution grid.

Responses to the Data Request are due no later than Friday, May 13, 2011. I will follow up with each of you to schedule a conference call to discuss the Data Request.

Regards,

Sean
