Subject: FW: QUESIONS about PG&E's Draft workshop agenda

Trina- Judge Vieth forwarded this to Bill, can you pass on to the correct person who is taking over for him?

Thanks.

Michelle

Subject: QUESIONS about PG&E's Draft workshop agenda

Bill --

Under Technical Agenda, II. Pipelines, 2nd black bullet is this phrase/concept: "Pressure reduction approach"

Not sure I follow. Why is this separately listed and what issues/concerns is it supposed to represent or capture?

Thanks,

Jean

Subject: Draft workshop agenda

Michelle:

Attached is a draft of an agenda for the workshop.

A few thoughts

- This contemplates either a two day or a two day plus an additional day a week or so later.
-
- This agenda would be for only the first day which is proposed to be just a technical level setting discussion.
- The second day could then be used to discuss other related issues such as costs, etc (I haven't formulated any structure around that at this point).
- The third day, or part day, if held could be used to synthesize Days 1&2 after there has been some time to digest it all.
- We suggest the use of outside experts to help define some of the technical issues and to render their thoughts on the decision tree concepts. We will forward you some ideas on those people for your consideration.

I am at an all day off site meeting today, but will get back to you with some ideas on Day 2 as soon as I can.

Bill
