Subject: PG&E's Class Location Study Report

Sent on behalf of Brian Cherry (Vice President - PG&E Regulatory Relations):

Paul:

In your letter to PG&E dated September 13, 2010 (Item 9), and in the Commission's Resolution L-403 adopted on September 23, 2010 (Ordering Paragraphs 18 and 19), PG&E was directed to review the classification of its natural gas transmission pipelines, determine if the classification has changed since the initial designation, and report the results to you. In response, on September 23, 2010, PG&E committed to report the results of its review by October 4, 2010, and perform a system-wide verification of pipeline class location designations and report the results by June 30, 2011.

On October 4, 2010, PG&E provided the Commission with its results on the review of all gas pipelines operating at pressures greater than 60 psig. Attached below is PG&E's report on the results of its system-wide verification of pipeline class locations.

Please let me know if you have any questions.
