

RECORD OF MATERIAL REMOVED FROM EXISTING NATURAL GAS TRANSMISSION PIPELINES

INSERT IN ENVELOPE ATTACHED TO MATERIALOR OTHERWISE TRANSMIT WITH THE MATERIAL TO ENSURE THIS FORM IS NOT SEPARATED FROM THE MATERIAL DESCRIBED

Date of Removal of Material:	Number of the Pipeline from which the Material was removed
Material Identification Number:	_ Suffix
NOTE: This number shall be the GPS coordinates (Latitude/Longitude)	of the location on the pipeline from which it was removed. If more than one
item of material was removed in too close a location to have a unique G	PS location, each piece shall have a numeric suffix following the GPS
location to ensure that each piece is identifiable from the other. Also, if a	portion of pipe is separated from the original, removed piece, each segment
shall have an alpha suffix indicating its end of the original piece; e.g., if t	he segment of pipe removed is from a pipeline running east to west, one end
will be designated with the suffix E (eastern end) and the other piece wil	be designated with the suffix W (western end).
The actual material removed shall be marked with a paint pencil, providi	ng the pipeline number of the line from which the Material was removed, the
Material Identification Number including the suffix, if any, an arrow indica	ating the direction of the flow of gas in the pipeline from which the material
was removed, a large "X" showing the top of the pipe as it was oriented	in the trench, the Hydrotest Test Segment Number if the pipe was removed
for/during a hydrotest, and the depth to the top of the pipe when it was r	emoved.
[Show Material Identification Number including su	rffix, if any, on envelope securely attached to Material]
Location of Removal:	
Reason for Removal:	
Contact information for individual who observed and documented the	physical removal of material:
Name (first, last): Phone N	umber:
Address: City:	State: Zip:
Title for this Project of Individual who observed removal of the Mat	erial:
Material Removed by:	
•	manus on DC 9 F. Donardmantil
Hydrotest Test Segment Number if Material was removed for/during	mpany or PG&E Department] g Hydrotest:
Depth of Material from the surface to the top of the Material remove	ed:
Direction of gas flow in pipeline from which Material was removed;	e.g., east-to-west, north-to-south:
Description of Material including diameter of material:	
Description of Material including diameter of material.	

Material Identification Number:	Suffix
