Subject: FW: PG&E UOG developer contact

David and Meredith,

I don't understand what the delay is in providing us a PG&E Solar UOG permitting contact. Please provide us a contact by tomorrow. If you wish to be on the call when we speak to your UOG permitting expert, we can accommodate that.

Thank you,

Jaclyn

Subject: RE: PG&E UOG developer contact

Thanks David (and Jaclyn!). Sorry for the delay, I was out of town last week.

Following up- my focus is on the current permitting process at the local level for ground based non-thermal production of less than 50 MW-- the kinds of projects that don't come through the PUC or CEC. Questions include: Anecdotally or more generally, how long does the permitting process take? What differences have emerged between counties? What similarities exist?

Does this help? The basic issue is that there are 58 counties in CA with potentially 58 different processes-- but there are movements to coordinate this process, and so I'm working on figuring out where we stand and where we might be/should be headed.

Thanks for any help you can provide,

Tommy

Tommy is reviewing the permitting process, so the questions are very basic. Since PG&E has experience permitting 20 MW solar PV projects, we'd like to learn more about your experience.

Sorry Jaclyn just getting to this. Are there specific questions you want answered? I would like to give our person a heads up first. Perhaps it might be best if we schedule a few minutes to chat.

Please let me know,
David

Subject: PG&E UOG developer contact

David,

We have some questions about the PG&E's experience with permitting its solar UOG projects. Can you please put me in touch with the right person?

Thanks,
Jaclyn
