Paul, Frank, Michelle,  
Following up on my conversation earlier this morning with Paul, Sandy Hartman, Joe Malkin and Brian and/or I would like to talk with you about the federal code provisions that relate to the authority the CPUC has to grant a special permit to deviate from federal regulations in an emergency. If at all possible, we'd like to discuss with you today; if not possible today, would tomorrow be possible? I will forward separately the relevant code section(s) the PG&E Law team is working from. Let me know what time(s) might work for you, and thanks in advance for your consideration.  
Best-  
Trina
