Subject: Thanks and Recognition

Julie and Paul,

As one of my many roles at the CPUC, I was given the responsibility of reforming the data acquisition and management process between the PUC and the IOUs for project data used in the RPS group. This data is critical to the successful development, management and administration of California's RPS program.

As of today, we have made significant steps in meeting several objectives including (1) ensuring the uniformity of data across all utilities, (2) improving data integrity, and (3) improving the timely acquisition of data in a seamless manner.

I would like to recognize Beth Schosinski and her large team at PG&E for working with the CPUC and contributing a significant amount time and effort that allowed us to meet these objectives. Beth and her team (1) established a data reform workgroup between the CPUC and all three IOUs, and (2) completely overhauled the database used for data acquisition and management in a collaborative process.

Going forward, we will be working with Beth and her team to streamline the process even further. This will ultimately decrease workload and improve efficiencies for both the RPS group and IOUs.

Kind Regards,

Jason
