NOTES:

the March 5, 2010, scoping memo stated that the principal issues of this proceeding revolve around the determination of the extent that the needs and costs identified by PG&E are just and reasonable and *should be reflected in rates*. WEM addressed this directive through the following issues: WEM recommended reductions to electric distribution, Customer Care, SmartMeter, Energy Supply, and A&G funding; proposed enhanced procedures and an audit for BTL activities; recommended that PG&E provide specific information to assist renewable projects to interconnect to its distribution system; recommended procedures to better ensure attention to distribution system maintenance, including in the territories of Community Choice Aggregators; and recommended imposing automatic penalties if PG&E continues to fund customer retention and economic development activities. The hours spent on each issue are noted on the worksheets for Mhomec and Bgeorge.

WEM allocation of time to issues:
