Tiny tweaks...

Back when Bill Stock was still with PG&E we had offered to do a letter to locals to facilitate hydrotesting. Here is a draft, with the idea of it being something that PG&E could provide to the locals in their initial meetings as part of the informational materials.

Questions for you, do you want anything further in it? Do you want it to be delivered as part of materials by PG&E or sent in advance if we can pry their contact list out of them with a cc: to PG&E so they can bring it out if needed (later is my preference but more work for us)? Further thoughts?
