Thanks Will, Earlier in the day, (10 to 1?), would be better but if that doesn't work, 1 to 4 is OK. I will compile names of those who plan to attend and send them ASAP.

Thanks,

Dave

David and Mark,

Great to hear that Monday Aug 29th works for both of you. We just spoke with LLNL and that date works as well. Does 1:00 p.m. - 4:00 p.m. fit your schedules?

Perhaps you can also provide me with the names and email addresses of those individuals attending from your respective organizations and we will have the LLNL Protocol Office contact them directly regarding security badging requirements.

Best regards,

Will

Hi David,

We just heard back from Mark Toney at TURN that Aug 29th or 31st work best for he and his associates. Does either of these dates fit your schedule? If not, perhaps you can provide me with the dates that will fit your schedule to visit LLNL.

Best regards,

Will

Mark,

Perhaps you can provide me with a couple of dates that you and your colleagues would be available for a visit and then I can coordinate with LLNL.

Thanks,

Will

Thanks Brian, Yes, we would like to tour the lab. I already left a message with Eric Jacobson, who offered us a tour along with a briefing on the proposed project.

Mark and David - I'd like to extend an offer for you to visit the Lawrence Livermore National Laboratory and be briefed by Senior Staff on the CES-21 project that the joint utilities filed a few weeks ago. We aren't trying to sell you anything per se, but we would like to hear your views and give you an overview of what we are trying to accomplish. If that works for you and you'd like to see the campus (which is worthwhile in and of itself separate from the CES-21 project), let Will Johnson know and he will work out a time for both or each of you. Thanks

Brian
