I think that is not a sustainable schedule for the full number of segments. But it provides flexibility to go to something simpler. I think the issue of why it doesn't lock in for all of them is that we don't have strong sense of timing of the others and whether it would be sustainable, which is why it requires a filing that provides targeted timing of the requests.

Hmmm. I didn't realize the 24 days was the one situation - I thought it was all.
