Subject: RE: L101 Excavation Locations

Shilpa:

Thank you for the heads-up. I noticed there are only three excavations noted in your e-mail; however, during our last teleconference, it was indicated that 10-15 excavations were estimated to be performed. Does that mean the list in your e-mail will be supplemented with additional excavations, or just that less excavations are now planned? If it is the latter, what attributed to the reduction in the number of planned excavations from earlier estimates?

Thanks, Shilpa.

Sunil

Subject: L101 Excavation Locations

Sunil,

As a follow-up to our conversation regarding the validation of L101 with a higher standard, attached is a listing and maps of the three excavation locations associated with the sleeves for L101. Our plan is to start excavating on September 1 to ensure we get this work done for the winter season. We will

continue to provide notification to the CPSD in the usual format addressed to Raffy, but wanted to give you a heads-up following our discussion.

Thanks.

Shilpa
