DATA REQUEST SET Track III DRA-SCE-001

To: DRA

Prepared by: Raymond Johnson

Title: Manager, Demand and Price Forecasting

Dated: 07/18/2011

Question 02:

Originator: Karen Paul

Does the information provided in response to the request in subpart (a) above regarding SCE's forecasted GHG requirements incorporate the new information in the ARB's July 2011 Discussion Draft (pages A-79 through A-82) regarding replacement electricity that substitutes for electricity from a variable renewable resource?

- a. Please provide a list of all contracts that SCE has in which replacement electricity is being used to substitute for electricity from a variable renewable resource.
- b. Does SCE have any contracts for replacement electricity in which the emissions factor of that replacement electricity is greater than the ARB default emission factor? Please list all such contracts and the emissions factor of that replacement electricity.
- c. Please provide a discussion of how the updated Section 95852 of ARB's July 2011 Discussion Draft impacts SCE's forecasted GHG requirements under ARB's cap-and-trade program.

Response to Question 02:

The information in Question 1a does not incorporate the new information in the ARB's July 2011 Decision Draft.

2.a - SCE is currently evaluating ARB's discussion draft and planning to seek clarification from ARB on what types of contracts qualify or may qualify for treatment as "replacement energy."

2.b - See the response to 2a above.

2.c - This analysis has not been performed.
