Subject: Stuff we want in follow up from tabletop that we will want if an incident does occur

Trina and Jennifer- in follow up from today's exercise, some specific things that would be helpful to us in ensuring we are best positioned to be informed and informing key stakeholders on this end. So here are the items.

Can we get public contact list that PGE uses if an event unfolds? Not just the CPUC contacts but also the other local/governmental officials. That would help us know who might be contacting us based on early info.

Could we get copy of PGE standby communications for curtailments as well? (This we could get now)

Could we get list of customers that will be curtailed under Section 583 if a curtailment occurs?

If an incident occurs we will want after the fact report of cost/cost allocation.

This was very helpful

Thanks,

Michelle
