I spoke with Sid - and that is a fine plan. Your people should be polite to the others, but tell them the proceeding is on-going and until it is completed this is all that you are doing - It is a mess - but this is a perfect example of President Peevey jumping in because there was too much "fiddling" around with your people - and Peevey was frustrated! He did not mean to say what he did - but he said it off the cuff - frustrated!
and - we all know what he says is just "dicta" - not a commission order -

We've received another 30 calls today. It is getting out of hand. I suggest we change out the 16 + the one Peevey identified at the PUC meeting and perhaps no more.
