Subject: RE: Topock Station Suction Piping

Shilpa:

I request PG&E provide a listing of all Operator Qualification covered tasks included in the pressure test performed at Topock, as well as a listing of all personnel, PG&E employed and contractor, indicating the tasks on which they were qualified at the time of the test(s). This would also be an item to address in future requests.

Thanks, Shilpa.

Sunil

Sunil, Michelle, Julie,

If it was not clear during our conversation yesterday, you should also feel free to call Redacted of Kiefner with or without us also on the line. Here is the information we have for Redacted

Redacted

Redacted @kiefner.com

We're currently revising the cover letter we gave to you yesterday to conform to the final decision and to include details that were in the attachments for easier review. I'll share it with you this afternoon.

Thanks.

Shilpa

Subject: Topock Station Suction Piping

Michelle, Julie, Sunil,

As a follow-up to our meeting yesterday, we wanted to emphasize our availability to answer any questions you may have. Shall we get together via phone or in person this afternoon for further questions and feedback about what should be presented on Monday?

After our discussion on spike testing yesterday, we spoke with Redacted at Kiefner who does not recommend spike testing for certain situations, including station piping. He is available to answer any of your questions on Friday and is preparing documentation that we will share with you once it is complete.

Thanks again for meeting with us yesterday. Let us know what time works for you.

Shilpa
