Subject: RE: Northstar

Scott - not a problem. I believe it has more to do with the client who doesn't understand the PUC processes.

Brian,

Just left a message for you on your cell. Maybe we can chat later today or tomorrow. In the meantime, I would like to request that PG&E refrain from any lobbying efforts, either of ED or Commissioners, regarding this resolution. It was a lapse of judgement on my part to reveal ED's position in advance, so please let me deal with this internally for now.

Subject: Northstar

Scott - just got a panicked call from Steve Larson over Northstar. I told him I hadn't heard there were any problems - in fact, given the transmission adder, things should be better for the contract. I suspected that the Withdrawal is a result of the fact that it needs to be written for approval instead of rejection. If my recollection is correct, can you let me know ? Thanks.
