Subject: RE: PG&E seismic costs?

Hi Truman:

Glad you finished up with the GRC's; they are always such grueling proceedings. I apologize for the long delay on this end. We are in the midst of RFP's for the seismic work and so still finalizing our costs. In addition, we will be filing a motion to re-open A.10-01-014 to recover additional costs. I am having some back and forth on that motion internally; I hope it will be filed by September 15, however. I would like to provide DRA the response to the data request simultaneous with filing the motion, so we don't get ahead of ourselves.

Thanks,
Jennifer

Subject: RE: PG&E seismic costs?

Hello Jennifer,

Now that I am recovering from the whirlwind that was DRA's Sempra GRC filing, I'm inquiring whether PG&E's Geosciences group has made any progress on this request. DRA's testimony due date was postponed to Sept. 30th.

Hi Truman. I will forward to the geosciences group to see if we can fill in the blanks. Just to let you

know, we will be filing a motion to re-open A.10-01-014 to request additional funding for the 2D and 3D seismic studies that were the subject of that application. The cost will be significantly higher than the \$16.73 M we anticipated and received funding authorization for -- on the order of 2-5x higher looking at the optimistic and pessimistic scenarios. We hope to file the motion to re-open in the next few weeks.

Jennifer

Subject: PG&E seismic costs?

Hello Jennifer Post,

Mark Nelson and Jose Perez at SCE said you might be able to find out how much money PG&E spends on its Long Term Seismic Program (LTSP) and on the recently approved seismic studies. I assume LTSP costs are recovered in the GRC. Attached is SCE's data response to DRA, comparing their \$64 million seismic request with a small amount of public information about PG&E's spending. My hope is that someone at PG&E can fill in the PG&E estimate columns.
