BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Rulemaking Regarding Whether, or Subject to What Conditions, the Suspension of Direct Access May Be Lifted Consistent with Assembly Bill 1X and Decision 01-09-060.

Rulemaking 07-05-025 (Filed May 24, 2007)

NOTICE OF EX PARTE COMMUNICATIONS

Pursuant to Rule 8.4 of the Rules of Practice and Procedure of the California Public Utilities Commission ("Commission"), the Marin Energy Authority ("MEA"), City and County of San Francisco ("CCSF"), Retail Energy Supply Association ("RESA"), the Alliance for Retail Energy Markets ("AReM") and the Direct Access Customer Coalition ("DACC") provide the following joint notice of ex parte communications. On Friday, September 16, 2011, three ex parte meetings were held with Damon Franz, advisor to President Peevey, Bishu Chatterjee, advisor to Commissioner Simon and Stephen St. Marie, advisor to Commissioner Sandoval. The meetings were held from 11:00 to 11:30, 11:30 to 12:00 and 2:00 to 2:30, respectively.

The meetings were initiated by Daniel Douglass, counsel to AReM and DACC, who was joined by Elizabeth Rasmussen of MEA, Jeanne Sole and Michael Campbell of CCSF and Sue Mara of RESA. Representing DACC were Chris Hendrix of Walmart, Dirk van Ulden of the University of California, Len Pettis of the California State University and Michael Rochman of the School Project for Utility Rate Reduction. The meetings occurred at the office of the Commission at 505 Van Ness Avenue, San Francisco, and each lasted for approximately thirty minutes.

The purpose of the meetings was to discuss the proposed decision ("PD") issued in this docket on August 23, 2011. Using the attached document as a conversation guide, the discussion

first focused on issues pertaining to the Power Charge Indifference Amount ("PCIA"). It was noted that the Joint Parties' proposal properly values renewables in the IOU portfolio. Opposition was expressed to the element of the proposed RPS adder that ascribes 32% of the adder to a DOE premium that significantly understates the value of wholesale RPS renewables in California, and in fact does not even purport to measure this metric. Ms. Rasmussen provided a copy of the attached DOE's Green Pricing table and explained how inaccurate it was with regard to MEA's actual costs for renewable power. General support was expressed for the PCIA aspects of the PD, with a recommendation that the RPS adder be revised to eliminate the DOE premium element and that the Commission move to approve the PCIA revisions.

Turning next to the financial security requirement ("FSR") for electric service providers ("ESPs"), the parties expressed significant concerns with the PD's misinterpretation of the relevant statute, the extreme volatility of the adopted formula for calculating the FSR and the exorbitant costs that would be imposed on and severely damage the direct access market. It was recommended that a revised alternate PD should adopt the Joint Parties' proposal for having involuntarily returned customers placed on the temporary bundled service rate as a means of keeping the FSR at a more reasonable level. It was also noted that the PD's requirement that any third party guarantor must be AA-rated is also unnecessary, adds more to the cost of the FSR and will make it very difficult for ESPs to find qualifying guarantors. It was recommended that investment grade standing should be sufficient and an investment grade corporate parent should be eligible to serve as a guarantor. As an option, the participants also suggested a subsequent phase of the proceeding to consider the impact of the proposed FSR on ESPs and the adoption of a reasonable alternative that will not create barriers to entry for ESPs.

Ms. Mara presented a document (copy attached) that summarized security requirements for retail providers in other states with competitive markets. She also offered two graphs that

compared competitive market states with respect to the percentage of statewide load that has switched to direct access and the number of registered providers in each state. The purpose of the graphs were to illustrate the fact that despite the fact that California was the first state in the country to permit retail competition, it has gradually adopted barriers that are unfriendly to retail competition and discourage competition. The FSR proposal would be an additional and substantial barrier to competition that will harm competitive choice significantly

MEA and CCSF also expressed concern that the financial security requirement currently under consideration in the direct access docket should not in any event be made applicable to community choice aggregators ("CCAs"). The history of the CCA settlement on the financial security requirement was discussed, with MEA and CCSF noting that neither were parties to the settlement for the CCA bond amount filed with the Commission on June 24, 2009, in proceeding R.03-10-003. It was pointed out that the Commission needs to consider the financial security requirement for CCAs in R.03-10-003 and that the proposal under consideration in the direct access docket would be highly burdensome, costly, problematical and unnecessary.

Respectfully submitted,

Carriel W. New

Daniel W. Douglass Douglass & Liddell

SECURITY REQUIREMENTS FOR COMPETITIVE RETAIL PROVIDERS – SAMPLE STATES

State	Credit Standard (Standard & Poor's)	Financial Security Amount
CA Proposed	AA	Unknown may vary from \$100,000 to \$25 million+
СТ	Not Specified	Lesser of (a) \$250,000 or (b) 5% of estimated gross receipts of one year of operation.
IL	BBB-	Varies from \$30,000 - \$300,000 depending on type of customer served.
MD	Not applicable	Proof of financial integrity. <u>If</u> collecting deposits or prepayments \$50,000 initially then 100% of deposits or prepayments.
NY	BBB	Must satisfy creditworthiness requirements
PA	Not applicable	Initially \$250,000; after 1 st year 10% of reported gross receipts.
TX	BBB-	Can meet rating or net worth requirements; if not may provide letter of credit of \$500,000.
