September 27, 2011

**COMMUNITY ENVIRONMENTAL COUNCIL  
MOTION FOR PARTY STATUS**

The Community Environmental Council (“Council”) respectfully requests permission to intervene in this proceeding.

The Council is a member-supported environmental non-profit organization formed in Santa Barbara in 1970 and is the leading environmental organization in the Central Coast region of California. In 2004, the Council shifted its primary focus to energy and transportation issues and is spearheading a regional effort to wean our communities from fossil fuels, on a net basis, during the next two decades. The Council is almost unique in combining on the ground work on a number of energy and climate change-related issues with concurrent work on state and federal policy issues. The Council’s state policy work is directly informed by experience with what has worked, or is likely to work, at the local level. More information on the Council and its energy programs may be found at [www.cecsb.org](http://www.cecsb.org).

The Council requests party status in this proceeding in accordance with Section 1.4 of the California Public Utilities Commission (“Commission”) Rules of Practice and Procedure. In particular, the Council plans to comment on the recent TREC Alternate Proposed Decision and other issues as they arise.

The Council has long been a supporter of renewable energy and has been active in many previous Commission proceedings relating to renewable energy and energy efficiency, including the previous LTPP (R.08-02-007). The Council plans to continue its involvement in the current LTPP along the lines of where it left off its involvement in the previous LTPP, by focusing on wholesale

distributed generation, greenhouse gas compliance rules, and ensuring that the Commission does not approve unnecessary fossil-fired generation.

All correspondence should be sent to:
