Subject: RE: Data request re SM Opt-Out costs, Part II

Please also show how PG&E derived the price proposal (for radio turn-off and monthly reads) from the "cost model" (to be provided in the previous data request). You can send these separately to expedite.

Subject: Data request re SM Opt-Out costs

This is a data request on costs with respect to the PG&E's application/proposal for SM opt-out.

Please provide an analysis of how the various cost components of the opt-out program would change at different take rates (# of people choosing to opt-out). Please separate the relatively fixed components from the variable components. For the latter, please show how the variable cost item varies with opt-out rate.

To summarize, please provide sufficient detail to enable the reader to estimate program costs under different assumptions involving opt-out rate. Please indicate over what range of opt-out rates would the above cost data be valid.

Thanks.
