Subject: Re: MobileHome Park OIR

You should feel good that PG&E is out front on a safety issue. Encouraging.

> Akbar - you are correct. PG&E's position is that mobile home park upgrades or replacements should be socialized. We did not come to this position lightly. There has been serious Commissioner interest in this issue over that last few years beginning with Commissioner Bohn and now Commissioner Florio. The policy debate has centered on how does the Commission maintain public safety of a network of gas and electric services that may or may not be up to code or reliably maintained. 90 percent of Commission safety staff time has focused on inspecting mobile home parks instead of high pressure gas transmission lines. In a post-San Bruno world, this is a serious problem. From our perspective, we recognize the public safety risk too. However, we also recognize that if it is the Commission's desire to resolve this issue by requiring the IOUs to take over the mobile home parks gas and electric operations, then in many if not most cases, we will need to completely rebuild the infrastructure to our current standards. Such an undertaking will be expensive. Preliminary estimates for PG&E are north of \$600 million. We don't believe Rule 15 and Rule 16 will be sufficient to resolve this matter in a way that maintains public safety. That said, we would welcome the opportunity to discuss this matter with you further.
