Subject: Excelsior District Outage

All,

We have a large outage affecting approximately 2585 customers on both the Silver 401 and H-1106 circuits in the Excelsior and Visitacion Valley districts. At this time we suspect that both outages are related. Multiple T-men and C-men are enroute. We also have a preliminary report of a failed overhead transformer at the 100 block of Goettingen. More to come.

Andy
