That would be helpful. Thank you.

Michelle

Thanks Michelle. We're going to tighten the process on our end as well so you receive a heads-up from one of us directly (to whom you sent the original request) that we have responded. Given the amount of emails I expect you receive, it will serve everyone well on these urgent requests to highlight responses.

Have a good weekend.

Shilpa

Hi there- I did find it. Thank you for the efforts to get it done. What happened is that I have anything that is sent to the San Bruno list that says data request in the subject line moved to a separate folder that I monitor every couple of days. Because I did not expect this to be sent in that manner, I didn't look for it there during the day so didn't realize it had been sent. I had assumed it would just be attached to this note and sent to me since it isn't really a San Bruno data request.

Anyhow. Thanks for the efforts.

Michelle

It was sent to you this morning, from Redacted at PG&E. Do you not have it?  
Trina

Thanks for the heads up. We should be able to get you the planned work by Thursday.

Trina

**Subject:** Making Information Available to Local Governments

Trina, Jennifer, and Shilpa- on Thursday, Paul Clanon and I will be talking to the City/County Association of Governments

of San Mateo County. We understand that Laura Doll will be the PG&E rep there. Some of the issues that the CCAG is interested in are:

1. Reviewing PG&E's inspection records of pipelines, to make sure the pipelines are safe
2. Knowing the dates when PG&E has scheduled pipeline inspections - information they say they have had trouble obtaining from PG&E

Is it possible to get a list of planned hydrotests, MAOP digs, or any other inspections/activities related to gas pipelines that will be occurring within San Mateo County over the next six months by Thursday? What is your local government contact plan to keep communities abreast of activity in the areas?

Can we also get a list of activities (hydrotests, MAOP digs, inspections, leak surveys/patrols, replacements, etc.) related to gas pipelines in San Mateo County over the last 10 years? This may not be feasible by Thursday, but at least give me a ballpark timing (and it should not be past next week) by Thursday.

We would very much like to see PG&E bring someone (sufficiently high up) from the engineering side of the house that can be their point of contact.

Please let me know if you have questions.

Thanks.
