Subject: PG&E QA Process Manual

Hi Sunil:

Per our discussion, attached are documents that describe our Quality Assurance process for PG&E's hydrotest program. These documents may not describe all of the QA processes PG&E has in place because some portions of the work done by the hydrotest program cross multiple programs and may be covered by another QA program. The documents attached include 4 attachments which cover our hydrotest QA process manual, a document that describes our hydrotest document management process and a document that provides a short description of the role of Bureau Veritas.

Please let me know if you have any questions.
