OGDEN POWER PACIFIC, INC. (BURNEY)	QF	10	[Redacted]	[Redacted]	Sep-15	Shut Down/Can Restart	[Redacted]	[Redacted]	[Redacted]	[Redacted]
Legacy QF Total		404								

1 Does not include Liberty Biofuels Project from 2005 RPS RFO. This project is a waste burner rather than a biomass project, has missed its milestones and output is not included in PG&E's compliance projections
2 Reflects sum of November 2007-October 2010 energy and capacity payments per paid kWh
3 For non-executed amendments, pricing reflects all-in pricing (sum of energy and capacity, if applicable); for executed amendments under "open book" and "IEP Extension", reflects the Payment Cap.
4 SPI Sonora mill shutdown in early July. The mill is operational, the boiler is running, and steam is being produced. The generating unit has not provided power yet.
5 Calculated as the average paid generation from 2007, 2008 and 2009.
