Shilpa,

Item 53, in Attachment A to PG&E's October 31, 2011 filing - **PACIFIC GAS AND ELECTRIC COMPANY'S (U 39 G) SUPPLEMENTAL RESPONSE TO LEGAL DIVISION'S "NOTICE AND DISCLOSURE OF SAFETY EVIDENCE AND COMPANION MOTION FOR PUBLIC RELEASE OF EVIDENCE"** - discusses a 6/21/56 job for "...the relocation by replacement of a section of pipeline in the Crestmoor subdivision...installing 1900' of 30" pipe, abandoning 450' of 30" pipe, and removing and salvaging 1400' of 30" pipe installed in 1949." The filing goes on to state: "The salvaged pipe **reused on this job has been removed from service.** There is no indication what was to be done with the remainder of the salvaged pipe..." (emphasis added).

We request that PG&E explain what is meant by this statement and if the statement is in reference to the 1956 job which relocated Segment 180 on Line 132. Specifically, what evidence does PG&E have that salvaged pipe was "reused" on the job being referred to in Item 53? What evidence does PG&E have that the salvaged pipe reused on the job referred to in Item 53 "...has been removed from service..." and when was it removed from service?

Item 61, in Attachment A, discusses a 10/17/56 job and a "Combined Shipping Notice and Transfer showing shipment to this job of 158' of 30" pipe salvaged from a 1949 job." The filing goes on to state: "This salvaged pipe was used for casing, not for gas pressure service."

We request that PG&E provide details, and copies of all documents, which allow it to conclude, with certainty, that the 158' of 30-inch pipe salvaged from Job Gm 136471 was used for casing and not for gas pressure service on Job GM 136774 or any other job.

Thanks, Shilpa.

Sunil Shori
