Subject: RE: Confirming Kick off Meeting for Monday Nov. 7 - Investigation of hydro test failure T117, L300B MP 283.3, PSRS 12550

All,

I enclose the revised test protocol incorporating the comments that I have received.

If you need to contact me before Monday, please use my cell phone.

[Redacted] Sr. Engineer

**PG&E-ATS Materials/Chemistry/Environmental Support Unit (metallurgy - failure analysis - welding - corrosion - materials)**

**Applied Technology Services Department** internal **866-5356** or **(925) 866-5356**, cell for urgent needs  
(925) 719-4862

**Subject:** Confirming Kick off Meeting for Monday Nov. 7 - Investigation of hydro test failure T117, L300B MP 283.3, PSRS 12550

All,

You've all accepted the calendar request but I wanted to get this note out to confirm the meeting for next week is still on and let you know that the lead for PG&E will now be [Redacted] I will still be on the team but not leading the investigation. Jerrod is a degreed metallurgist and has held positions in the natural gas industry as a metallurgist and as an ILI engineer, and a PG&E General Construction Area Foreman and is very qualified to manage this investigation.

Paul is working on taking the comments associated with the investigation protocols and we should see a final draft by the end of the day which will be circulated for comments.

Dave is pulling the corrosion monitoring/history on this section of pipe and will have information available next week. What we know about the inspection history on the pipe is that , other than monitoring required by regulation, there was a CIS and DCVG survey done in 2000. MP283.3 is not in an HCA but is scheduled to be ILI'd next year as part of an HCA, ILI run.

If you have any questions then please feel free to give me a call.

Bob
