Subject: Project Status Report - Investigation of hydro test failure T117, L300B MP 283.3,
PSRS 25550

All,

The L-300B hydro-test failure analysis will kick off **Monday morning November 7, 2011, at 9:00 am** at the PG&E Applied Technology Services Metallurgy Lab at 3400 Crow canyon Rd, San Ramon CA.

Logistics

This facility is a control access facility so visitors will need to call [Redacted] at his cell [Redacted] [Redacted] or [Redacted] at [Redacted] (cell) for access into the complex, unless you already have access (as in the case of PG&E personnel with card access). Parking is located in front of the facility or overflow across Crow Canyon Rd at the PG&E San Ramon Valley Conference Center at 3301 Crow Canyon Road.

Start times for the remainder of the week can be discussed on Monday.

Site Safety Orientation

A worksite, facility, and emergency orientation will be given to the team by Paul Tibbals on Monday morning.

Investigating Team & Roles/Representation

Redacted – PG&E Team Lead

Redacted

Redacted – PG&E Corrosion & Metallurgy

Bob Fassett – PG&E Law Department

Sunil Shori – CPUC Safety Division

Redacted – Exponent Metallurgist & Failure Analysis Expert

Redacted Kiefner & Associates Pipeline Failure Analysis Expert

Preliminary Schedule

Monday – Investigating team to finalize failure analysis protocol and share any relevant historical pipe information. A goal for the day is to complete the as-received condition documentation up to and through coating removal and possible sectioning the pipe into workable lengths. A PG&E construction crew will be on site Monday and Tuesday for coating removal and disposal.

Tuesday – A Mears construction crew will be on sight for sand blasting and wet florescent magnetic particle testing (WFMPI). Further pipe and weld NDT, as planned in the protocol, should be underway on Tuesday.
