Subject: FW: Pressure v Gallons lost

Sunil:

We did continue having a slow leak overnight. Here is the pressure and gallons lost chart. We are still discussing our plans on how to find the leak. We will likely be working with Praxair on their SeeperTracer leak detection process. I'll give you a call once we decide. If we use this system, we will need to dewater the pipeline and then refill the line while adding in the seeper gas. This will likely take all day into tomorrow.
