Subject: PG&E's Supplemental Documentation (part 1 of 2)

Mr. Shori,

Attached for your review are the supplemental documents containing the results of one final pressure test on DFM 0211-01 and three validation excavations on very short sections tapped off Line 101. Due to the large file sizes of the attachments, I will be sending the information in two parts. A hardcopy of the files will be delivered to you shortly.

If you have any questions, please contact Shilpa Ramaiya at 415-973-3186.

Thank you.
