Subject: RE: Aldyl-A

Okay with me saying this in a letter that is bound to become public?

PG&E has identified initial targets for replacement, including parts of Cupertino and Roseville, where it has begun the permitting process to replace distribution facilities, in light of its preliminary risk analysis. PG&E has also begun discussions about a replacement project with landowners and local officials in St. Helena in advance of submitting permits.

thx

Michelle

Michelle,

Cupertino and Roseville are the only projects currently in the permitting process, but we are talking with owners in St. Helena to prime the path for permitting and replacement there.

Laura- I am working on a response to a letter by Assemblymember Hill related to Aldyl-A and I want to confirm that I am characterizing something correctly. Can you confirm that this language is accurate?

PG&E has identified several areas, including Cupertino, Roseville, and XX, where it has begun the permitting process to replace distribution facilities, in light of its preliminary risk analysis.

It would be great if my letter could include one or two other places in the XX spot, that have begun but were not publicly splashed around yet.

I know you guys are busy, but it would be helpful if I could get an answer very soon. Please let me know what is realistic.

Thanks.
