Subject: Aldyl-A

Laura- I am working on a response to a letter by Assemblymember Hill related to Aldyl-A and I want to confirm that I am characterizing something correctly. Can you confirm that this language is accurate?

PG&E has identified several areas, including Cupertino, Roseville, and XX, where it has begun the permitting process to replace distribution facilities, in light of its preliminary risk analysis.

It would be great if my letter could include one or two other places in the XX spot, that have begun but were not publicly splashed around yet.

I know you guys are busy, but it would be helpful if I could get an answer very soon. Please let me know what is realistic.

Thanks.
