Subject: Follow-up to meeting with NextEra re: North Sky

Hi Meredith,

I just wanted to briefly recap the issues that I had for PG&E coming out of our meeting this morning with NextEra concerning development milestones for the North Sky River wind facility:

- (1) Does PG&E have access to any studies (similar to the one NextEra has requested from CAISO) assessing the potential impact of uncertainties over the Chino Hills transmission line impacting transmission for North Sky River?
- (2) Can PG&E provide background on the rationale and calculation for arriving at the annual floor and cap values for penalties associated with RA delivery associated with North Sky River?
- (3) Can PG&E provide its rationale for negotiating this PPA at a fixed flat rate rather than one subject to TOD adjustments?

I think that's all that I've got, and I'll look forward to hearing from you on these issues.

Jason, if you flagged something from our meeting that I didn't address here, let me/Meredith know.

Thanks,

Adam
