Subject: Fw: Important Heads up: Candlestick Park Power Outage

FYI. Looks like it may have been a City switch.

Subject: Important Heads up: Candlestick Park Power Outage

All,

Shortly before game time at Candlestick Park this evening, a power outage impacted the stadium. According to preliminary reports, the auto-transfer switch owned by the City failed to operate properly to switch load to the second circuit serving the stadium and the stadium was without power for nearly 10 minutes. Power has since been restored.

Media interest is heavy at this time.

Our messages are:

- We are actively investigating the cause, and in cases like this it could be a number of things - from equipment owned by PG&E or equipment owned by the customer
- Candlestick Park was the only customer affected by the outage
- As a common practice, PG&E always works with the customer in advance of a major event, in this case the game, to prepare a quick and comprehensive response to any potential issue.

Roger
