Richard

[Redacted] was finally able to reach Captain Mccoun a few minutes ago and, as she notes below, there will be a meeting in January with what should be all the right people to address his concerns.

Just fyi, there was first responder training last fall in West Sacramento but no one from SPD was able to attend. I believe this is an issue that is relatively easily addressed.

Have a good holiday!
Laura

I just talked to him. We'll be setting up a meeting in January to discuss the holder yard. I told him we would include gas, electric ops and corp security.

Thanks,

[Redac]

Hi Laura: After talking with Jim Maccoun of the Sacramento Police Department on the phone today, he sent me the below email expressing his concerns that PG&E has not been adequately communicating with the Department about a PG&E gas facility in his area of command. Please have someone at PG&E who is knowledgeable about the site contact Mr. Maccoun as soon as possible and work with the Department to resolve his concerns.

Richard Myers, CPUC Energy Division.

PS: Jim, Laura Doll is Director of Regulatory Relations at PG&E.

Subject: PG&E natural [Redacted] in [Redacted]

Mr Myers,

I am the area commander for the North Command for the Sacramento Police Department. PG&E has a large (15-20 acre) underground storage/pressurization facility in a [Redacted] within my area of command. Last year, following a consultant's report, the [Redacted] [Redacted] felt this facility was enough of a potential risk that they permanently closed a nearby [Redacted]. This raised our awareness and we requested that PG&E provide some clear signage that would assist first responders, brief us on security measures (alarms/ communication protocols) and insure that simple direction/coordination for City of Sacramento first responders was given. The area in question is a high crime area and very prone to crimes involving metal theft. For several months we have received email communication indicating that something would happen, yet nothing responsive has occurred. We did have some additional concerns when PG&E moved heavy equipment from a contractor onto the property a few weeks ago and they did respond to that inquiry and advised that it was routine 10 year maintenance.

Yesterday (12-15-11) I was driving by the site and observed a fencing contractor who informed me that PG&E had summoned them because of cuts/intrusion into the facility. We have received no notification from PG&E of this activity. The Sacramento Police Department has experienced a 29% reduction in staffing due to budget cuts and certainly can not insure the safety and security of this site. However, we wish to work with PG&E on this issue of mutual concern. I have copied Lt. James Hendrickson of our Homeland Security division as his group has been involved in these past efforts at communication and his group has trained evaluators who can make recommendations regarding the security needs of this facility in keeping with the ACAMS program. SPD can also coordinate discussion or briefing with the Sacramento Fire Department as well.

Thank you in advance for your assistance in this matter,

James Maccoun, Captain

William J. Kinney Police Facility
