Subject: RE: Hydrotest next week

I had hoped to attend but after double checking my calendar I won't be able to, after all.

Thank you very much for the offer.

Subject: Hydrotest next week

Bishu and Phyllis

I am awaiting final details, but wanted to pass on general logistics for you to think about as you decide whether you can make it next week.

The test location is remote. It has been described to me as "near Kettleman." There aren't buildings in the area, so we will need to connect somewhere that is easy to find before the drive out to the site.

You had mentioned flying, for example to Fresno, and renting a car. I just looked on line at flights and it seems impractical. Alaska Air flies into Fresno, via Seattle. United flies there via LA. In both cases it requires two flights and takes over 5 hours and costs at least \$500. And then you'd have to rent a car and drive another hour out to the site.

It's more likely you would elect to drive down, perhaps on Wednesday afternoon, and spend the night. I THINK Kettleman would be the closest place with motels, and that is about a 4 hour drive (according to Google Maps). Then someone from PG&E could meet you Thursday morning and get you to the site and you'd drive back Thursday afternoon.

Hydrotesting is a multi-stage process, as you may know, and the timing of testing activities varies according to conditions. Once the gas is removed from the pipe it is filled with water and then there is a waiting process for "settling" before the test is initiated. So the pressure test itself, while scheduled for Thursday, might not happen exactly when you would be there. But you would definitely see the process in action and have a chance to talk with the people who do the testing.

Just wanted to give you a general idea of what's involved in making the trip down to the site.

More details after you have decided!

Laura

Laura – It looks like Phyllis and I may make the trip since Commissioner Simon will not be able to go. Please send us details. Thanks

Phyllis and Bishu

Will you talk with the Commissioner just so he knows this didn't work out? He had mentioned it again last week and I expect he'll be disappointed. Scheduling is so hard, especially when his schedule and the challenges of hydrotesting schedules are combined!

Bishu -- do you want to go solo?

I'm sorry but Commissioner Simon has a prior obligation that day. He's pretty much booked until late February.

Thanks for checking! I believe this is the only opportunity before NARUC.

Phyllis
The test will be Jan 24 for sure.
Can the Commissioner make that?

Phyllis and Bishu

The hydrotest on line T119 NOW is going to occur on either January 21 or 23. In other words, it will NOT occur on Jan 17 as I previously communicated. These tests are complicated and require lots of approvals and clearances and so it had to change by a few days.

We expect to know the final, hard test date by the end of this week and will get back to you with that asap.

Thanks

Laura
