Subject: Update on McKinley School in San Jose

Michelle, Julie and Sunil,

A speaker at last Thursday's town hall meeting in Palo Alto raised the issue of a gas leak at the McKinley School in San Jose.

Last Friday a PG&E crew was able to help identify the source of a small leak on the customer's side of the gas system. It was a regulator device on the customer's system that was buried and had deteriorated. PG&E closed off service to the school to allow repair work to be done over the weekend by a plumber retained by the school. The PG&E crew also assisted with excavation to speed the repair process. The repair passed inspection today and PG&E staff were on-site to assist in relighting appliances and restoring full service to the school.

Laura
