Hi Sunil

The validation dig that Sumeet suggested appears to be the only major work going on next week locally. We'll ask him to provide more detailed information.

Ben

Folks,

I appreciate I have heard back from everybody; however, I still haven't received information regarding specific work or locations. I need this in a hurry.

Thanks.

Sunil

Sunil,

We have a few MAOP Validation digs that are planned for next week. [Redacted] is currently confirming the schedule for 1/30 and will provide the details regarding the excavations by tomorrow. It would ideal for the Deputy Administrator to visit a site that has been excavated and where we are performing the direct examination of the respective pipeline or associated component.

Sumeet

Ben and Sumeet,

I know there is no hydro-testing occurring next week; however, I would like to find out if there are any validation digs, or other field excavations, occurring on January 30th in the SF Bay area. A Deputy Administrator with PHMSA will be in the area on that day and may want to see the type of work PG&E is performing in to ensure system safety going forward.

Please let me know at your earliest convenience of possible on-going field work near the SF Bay area that you believe could be of interest and with whom at PG&E a possible visit would need to be coordinated.

Thank you.

Sunil
