Jaclyn,

We had some technical issues with Teamsite (the program used to update web content) that were recently resolved. We updated the spreadsheet today. The spreadsheet lists all executed contracts, which will total 104.306 MW for E-SRG, leaving a remainder of 0.297 MW. We do not intend to execute any additional contracts until the program expands under SB32 as the next project on the waiting list exceeds this size.

Please let me know if you need additional information.

Thanks,
Meredith

Subject: FIT program subscriptions

Meredith,

PG&E's website states that the Renewable FIT program for non-waste water customers is fully subscribed. I calculated the amount under contract, which is equal to 98.6 MW, yet the program cap is 105 MW. Can you help me understand this discrepancy?

Thanks,

Jaclyn
