## PG&E's 2010 Power Mix

PG&E delivers some of the cleanest electric power in the nation. When rainfall is normal, more than 50% of our electricity comes from a combination of renewable and greenhouse gas-free resources.

FRONT

## **Power Content Label**

Actual 2010 electric resources for Pacific Gas and Electric Company, as reported to the California Energy Commission.

ENERGY RESOURCES	PG&E 2010 POWER MIX* (Actual)	2010 CA POWER MIX** (For Comparison)
Eligible Renewable:	16%	14%
Biomass and waste	4%	2%
•Geothermal	5%	5%
Small hydroelectric	3%	2%
•Solar	<1%	<1%
•Wind	4%	5%
Coal	1%	8%
Large Hydroelectrić	16%	11%
Natural Gas	20%	42%
Nuclear	24%	14%
Other	1%	0%
Unspeci ed*	23%	12%
TOTAL	100%	100%

<sup>r</sup> Beginning in 2010, transactions not speci cally traceable to speci c generation sources are designated as "unspeci ed" in accordance with AB 162's revisions to Public Utilities Code section 398.2.

\*\* Percentages are estimated annually by the California Energy Commission based on electricity sold to California consumers during the previous year.

For information about PG&Es power content, contact PG&Bata3-5006 or information about the California's power mix or for general information about the Power Content label, contact the California Energy Commission at 1-800-555-7794 nwww.energy.ca.gov/consumer

<sup>1</sup> A significant amount of the energy generated by PG&E comes from clean, large hydroelectric power stations, which under California law, do not qualify as an eligible renewable resource.

Note:Due to rounding conventions, the numbers above may not add up to 100%.
