Subject: North Sky and TRTP 8A

Hi Meredith and Kerry,

I understand Jason has conveyed some questions from Cmr Florio and I about potential impacts of a delay in developing TRTP segment 8a on North Sky. More specifically, could PG&E face costs for energy or capacity it doesn't receive if completion of TRTP is delayed? Jason explained that this question required some consultation with CAISO and that the inquiry was ongoing.

On my end, if Cmr Florio needs to hold the item, he has to do so by 12pm tomorrow. Hopefully we can get more info by then.

Thank you!

Matthew
