Pacific Gas and Electric Company
350 N. Wiget
Walnut Creek, CA 94598
Attention Redacted

Test Contractor:	Contra Costa Inspection Co. – T-7 9/29/2011
Asset Owner:	Pacific Gas and Electric Company – 41474064-T7&9
Construction Contractor:	ARB – 0629-53-3500
Test Section:	PG&E T-7&9 L-105A, MP 38.00-41.00 L-105A-1
Test Date:	September 29, 2011
Certificate Number:	RCP 61362 - T-7&9, L-105A, MP 38.00-4100 L-105A-1

To whom it may concern,

This letter is to certify that the hydrostatic test performed on pipe owned by Pacific Gas and Electric Company and tested by Contra Costa Inspection Co. met the requirements of the Code of Federal Regulations, Title 49, Part 192, Subpart J (Class 3).

The test segment was subjected to a spike pressure test of 395 psig for 30 minutes, without observed leakage or yielding of the pipe segment. The 30 minute spike test and subsequent pressure reduction with volume bleed was included and is part of the 8.58 hour test duration period.

This hydrostatic test was completed successfully. Pressure was maintained on the test facilities in excess of 8.58 continuous hours without evidence of a leak failure. Water was the test medium. At the highest elevation point in the test section, the calculated test pressure was 359 psig and the established MAOP is 239 psig.

Pressure decreased 29 psi during the test. 11,262.72 ounces of fluid was intentionally released from the test section Net corrected volumetric change from beginning of the test to the end of the test is calculated to be 2,395.08 ounces, gain, which is equivalent to a 0.66 °F change in pipe temperature and within the error attributed to the temperature measurement instrumentation utilized.

Test pressure did not remain steady even though no leaks were observed. The volumetric gain is attributed to the error characteristic of the temperature measurement instrumentation utilized.

Sincerely,

Redacted

Hydrostatic Test Pressure

APPLICABLE CODE FOR CERTIFICATION: Test Date: 29-Sep-11

Code of Federal Regulations, Title 49, Part 192, Subpart J (Class 3)

This is to certify that the pipeline or pipeline section(s) described below was hydrostatically pressure tested in accordance with the following procedure:

Pipeline:	PG&E T-7&9 L-105A, MP 38.00-41.00 L-105A-1		
From:	0+00	To:	111+79

Were leaks observed?	No	Explain: PG&E
Acceptable Hydrostatic Test?	Yes	The test segment was subjected to a spike pressure test of 395 psig for 30 minutes, without observed leakage or yielding of the pipe segment. The 30 minute spike test and subsequent pressure reduction with volume bleed was included and is part of the 8.58 hour test duration period. No leaks were observed during the test period. The test section included 11,336 feet of buried and 156 feet of exposed pipe. Pressure lost 29 psi during the test. The buried pipe segment fluid temperature remained steady and the exposed pipe segment gained 3°F. 11,262.72 ounces of fluid was intentionally released from the test section. Net corrected volumetric change from beginning of the test to the end of the test is calculated to be 2,395.08 ounces, gain, which is equivalent to a 0.66 °F change in pipe temperature and within the error attributed to the temperature measurement instrumentation utilized. Test pressure did not remain steady even though no leaks were observed. The volumetric gain is attributed to the error characteristic of the temperature measurement instrumentation utilized.
Remarks
