Ed,
I will have my salesman meet with PG&E and see if this is something they want to pursue at this time. I will let you know what the verdict is when I find out.

Regards,

Subject: Automatic Gas transmission Shutdown Valve Operation

Jeff:

I have attached a schematic diagram of what we proposed to MRC for automatic closure of a gas transmission valve in the event of an earthquake and/or line break. Our system will be integrated into your existing operating system with the ability to override it if a catastrophic event occurs (earthquake or line break). Our system will use a 24VDC power supply as the current system is using. Also, I have added a power gas supply to the system.

Please review and let's discuss at your convenience. Thanks.
