Order Instituting Rulemaking on the Commission's) Own Motion to Adopt New Safety and Reliability Regulations for Natural Gas Transmission and Distribution Pipelines and Related Ratemaking Mechanisms.

R.11-02-019 (Filed February 24, 2011)

COMMENTS OF SOUTHERN CALIFORNIA GAS COMPANY (U 904 G) AND SAN DIEGO GAS & ELECTRIC COMPANY (U 902 M) IN **RESPONSE TO ASSIGNED COMMISSIONER'S RULINGS AND** SUPPLEMENT TO REQUEST FOR MEMORANDUM ACCOUNT

Southern California Gas Company (SoCalGas) and San Diego Gas & Electric Company (SDG&E) submit the following comments on the feasibility of transferring consideration of our proposed Pipeline Safety Enhancement Plan to another proceeding and supplement our May 4, 2011 Motion to Establish a Pipeline Safety and Reliability Memorandum Account, pursuant to the November 2, 2011 Amended Scoping Memo and Ruling of the Assigned Commissioner (November 2 Ruling) and December 21, 2011 Assigned Commissioner's Ruling Modifying Schedule to Allow Operators to Respond to the Consumer Protection and Safety Division Reports and Providing Further Direction on the Reassignment of Certain Reasonableness, Cost Allocation, and Cost Recovery Issues from the Rulemaking to Another Proceeding (December 21 Ruling).

In the November 2 Ruling, the Assigned Commissioner indicates that he is "considering narrowing the scope of the ratemaking issues in this proceeding by transferring ratemaking issues for the SoCalGas and SDG&E Implementation Plan to a separate phase of their ongoing general rate cases (GRCs) or to their next GRCs," and directs SoCalGas and SDG&E to "supplement their request for a memorandum account with an estimate of the costs expected to be incurred prior to the resolution of such an additional phase of their current GRCs (assumed to be no later than December 2012) and/or prior to their next anticipated GRC decision, along with an assessment of the feasibility of transferring the

ratemaking issues associated with the Implementation Plan to those cases.^{\downarrow} Subsequently, in the December 21, 2011 Ruling, the Assigned Commissioner indicates that "[u]pon further review, [he] now believe[s] that the pending Triennial Cost Allocation Proceeding. . . is the most logical proceeding for the SDG&E and SoCalGas reasonableness and ratemaking review" and directs SoCalGas and SDG&E to address the issue of "reassignment of the reasonableness and ratemaking issues to the Cost Allocation Proceeding versus the pending or a future general rate case." $\frac{2}{2}$

As explained further below, SoCalGas and SDG&E believe that the pending Triennial Cost Allocation Proceeding is an appropriate venue for consideration of their proposed Pipeline Safety Enhancement Plan provided that (1) the transfer to that proceeding does not result in undue delay of consideration of their proposed plan; and (2) the technical aspects or "substance" of the proposed plan is considered along with the ratemaking aspects. As directed in the November 2 Ruling, SoCalGas and SDG&E offer a proposed schedule for consideration of our proposed Pipeline Safety Enhancement Plan and supplement their May 4, 2011 Motion to Establish a Pipeline Safety and Reliability Memorandum Account to provide an estimate of costs that may be incurred prior the issuance of a final decision approving the proposed plan.

I. CONSIDERATION OF THE PROPOSED PIPELINE SAFETY ENHANCEMENT PLAN MAY TAKE PLACE IN THE PENDING COST ALLOCATION PROCEEDING.

On June 16, 2011, the Commission directed all California natural gas utilities to file comprehensive pipeline testing implementation plans by August 26, 2011.^{3/2} The Commission's decision stressed the need for rapid action, and further ordered that "[s]uch Implementation Plans shall be completed as soon as practicable, due to significant public safety concerns, and must include interim safety enhancement measures. . . . "^{4/2} Pursuant to this direction, SoCalGas and SDG&E, as well as Pacific Gas and Electric Company and Southwest Gas Corporation, all filed comprehensive implementation plans on August 26, 2011.

 $[\]underline{1}'$ November 2 Ruling, p. 4.

 $[\]underline{2}$ December 21 Ruling, p. 2.

 $[\]frac{3}{2}$ D.11-06-017, Ordering ¶ 4.

⁴ Id., p. 20.

In the November 2 Ruling, Assigned Commissioner Florio explained that he is "considering narrowing the scope of the ratemaking issues in this proceeding by transferring ratemaking issues for the SoCalGas and SDG&E Implementation Plan to a separate phase of their ongoing general rate cases (GRCs) or to their next GRC."⁵ "To assist in evaluating whether to transfer ratemaking for SoCalGas and SDG&E's Implementation Plan out of this proceeding," SoCalGas and SDG&E were directed to provide an "assessment of the feasibility of transferring the ratemaking associated with the Implementation Plan to those cases."⁶ In the December 21 Ruling, Assigned Commissioner Florio indicates that "[u]pon further review, [he] now believe[s] that the pending Triennial Cost Allocation Proceeding. . . is the most logical proceeding for the SDG&E and SoCalGas reasonableness and ratemaking issues to the Cost Allocation Proceeding versus the pending or a future general rate case."[§]

SoCalGas and SDG&E agree that the pending Triennial Cost Allocation Proceeding is an appropriate venue to consider their proposed Pipeline Safety Enhancement Plan provided that the transfer does not result in undue delay of consideration of our proposed plan, and so long as the technical aspects of our proposed plan are also considered in that proceeding. SoCalGas and SDG&E believe this is the Assigned Commissioner's intent in the December 21 Ruling, which states that it "would be beneficial to reassign the implementation plans to [the pending Triennial Cost Allocation Proceeding] to take advantage of the evidentiary record and policy decisions emerging there."⁹ SoCalGas and SDG&E construe the term "reasonableness," as used in the December 21 Ruling, ¹⁰ to include consideration of the technical aspects of the plan, but seek clarification on this issue.

SoCalGas and SDG&E would also not be opposed to transferring consideration of our proposed plan to a separate phase of our current GRCs. We are opposed, however, to transferring consideration of our proposed plan to a subsequent GRC proceeding. Transferring consideration of SoCalGas and SDG&E's proposed Pipeline Safety Enhancement Plan to a subsequent GRC proceeding would unduly

- $\underline{9}$ Id.
- 10^{\prime} Id.

^{5&#}x27; November 2 Ruling, p. 4.

 $[\]underline{6}$ Id.

 $[\]underline{7}$ December 21 Ruling, p. 2.

 $[\]underline{8}$ Id.

delay the matter, and thus be inconsistent with the Commission's directive to complete the Implementation Plans "as soon as practicable." While no set schedule has been established for the next General Rate Cases yet, SoCalGas and SDG&E anticipate that those proceedings will not be initiated until December 2013, at the earliest,^{11/} with a decision not expected prior to the end of 2014.

Regardless of the forum within which consideration of our Pipeline Safety Enhancement Plan takes place, SoCalGas and SDG&E urge the Commission to consider <u>both</u> the technical aspects of our proposed plan and the ratemaking aspects of our proposed plan in the same forum. This would avoid the risk of inconsistent decisions, increase administrative efficiency, and ensure that the ratemaking aspects of the proposed plan are appropriately considered within the context of the work that is contemplated by the plan.

II. PROPOSED SCHEDULE FOR CONSIDERATION OF SOCALGAS AND SDG&E'S PROPOSED PIPELINE SAFETY ENHANCEMENT PLAN

In the November 2 Ruling, SoCalGas and SDG&E are directed to propose a schedule for GRC consideration of ratemaking issues. Because the December 21 Ruling indicates that the Assigned Commissioner "now believes that the pending Triennial Cost Allocation Proceeding recently filed as Application (A.) 11-11-002 is the most logical proceeding for the SDG&E and SoCalGas reasonableness and ratemaking review,"¹² SoCalGas and SDG&E offer a proposed schedule below that could feasibly be implemented in the pending Triennial Cost Allocation Proceeding. Events highlighted in bold are proposed dates, while existing dates for this proceeding and the Triennial Cost Allocation Proceeding are indicated in normal font to facilitate consideration of the schedule by the Commission and interested parties. If consideration of SoCalGas and SDG&E's proposed plan is transferred to a separate phase of their pending GRCs, as opposed to the Triennial Cost Allocation Proceeding, then the dates could possibly be moved up to facilitate speedier review.

¹¹/ SoCalGas and SDG&E have proposed to file our next General Rate Case Application in December 2014, but if that proposal is not adopted by the Commission, then the filing would take place in December 2013.

 $[\]underline{12}$ December 21 Ruling, p. 2.

^{13/} These proposed dates take into consideration the schedule of Administrative Law Judge Douglas M. Long, should the matter be transferred to the Triennial Cost Allocation Proceeding, and are contingent on SoCalGas and SDG&E making our first two policy witnesses available for cross-examination on July 23-24, 2012.

III. ESTIMATE OF COSTS TO BE INCURRED PRIOR TO ISSUANCE OF A FINAL DECISION ON PROPOSED PIPELINE SAFETY ENHANCEMENT PLAN

To assist the Commission in evaluating whether to transfer consideration of their proposed Pipeline Safety Enhancement Plan out of this proceeding, the November 2 Ruling directs SoCalGas and SDG&E to "supplement their request for a memorandum account with an estimate of the costs expected to be incurred prior to the resolution of such an additional phase of their current GRCs (assumed to be no later than December 2012) and/or prior to their next anticipated GRC decision. . . .¹¹⁴ In Attachment A, SoCalGas and SDG&E offer the scope of work and estimate of the costs they may expect to incur if their request for a memorandum account is granted during the first quarter of 2012 and the Commission issues a final decision approving the proposed plan in the first quarter of 2013. This one-year timeframe would allow for careful and thorough consideration of the proposed plan by the Commission and interested parties, yet would also ensure that such consideration is not unduly delayed. Consistent with the Commission's direction in D.11-06-017 to propose a timeline that is "as soon as practicable," SoCalGas and SDG&E propose an aspirational scope of work in Attachment A that is ambitious, with the understanding that it may be infeasible to complete the entire scope of proposed work during the oneyear timeframe and/or within the scope of estimated costs if significant unforeseen implementation challenges arise.

The direct cost for the scope of work contemplated in Attachment A is estimated to require capital spending of about \$47 million for SoCalGas and \$9 million for SDG&E, and Operations and Maintenance (O&M) expenses of \$23 million for SoCalGas and \$0 for SDG&E, for a total of about \$79 million. The estimates do not include actual overhead costs that will be applied to the direct costs. The fully loaded and escalated cost for the scope of work contemplated in Attachment A is estimated to be \$54 million in capital and \$24 million in O&M for SoCalGas and \$10 million in capital and \$0 in O&M for SDG&E, for a total of \$88 million. As explained below, these estimates of direct costs are preliminary and could vary.

In preparing this scope of work and estimate, SoCalGas and SDG&E reviewed all testing and replacement work proposed in the Base Case for Phase 1A to determine a potentially feasible and

^{14/} November 2 Ruling, p. 4.

prudent scope of work to be performed during the one year period beginning in the second quarter of 2012 and continuing through the first quarter of 2013.^{15/} As explained in the August 26, 2011 Testimony in support of the Proposed Pipeline Safety Enhancement Plan, by definition, all proposed Phase 1A projects represent high priority work and were proposed to be completed during the four-year period beginning in April 2012.^{16/} In identifying projects that may get underway during the initial one-year period, SoCalGas and SDG&E took into account geographic, community, operational, resource and environmental constraints, along with the sub-prioritization process set forth in the proposed plan.

By performing an analysis utilizing all the aforementioned constraints, SoCalGas and SDG&E identified some projects that have a greater likelihood of moving through the engineering/design, permitting, and construction lifecycle quickly in order to commence and potentially complete field construction for some projects during the one-year period. Priority projects were also selected to begin engineering/design work so that those projects will be ready for procurement and construction after the final decision is approved. Additionally, projects that are anticipated to pose significant engineering/design and permitting challenges are identified to begin the engineering/design and permitting work right away in order to accelerate the potential construction start date. In general, these types of projects either consist of significant mileage for which the engineering/design timeline will be

<u>15</u>/ In our proposed Pipeline Safety Enhancement Plan, SoCalGas and SDG&E seek approval of the "Proposed Case," which, in addition to the costs associated with the plan to test or replace pipeline segments that do not have sufficient documentation of pressure testing to meet the requirements set forth in D.11-06-017, proposed interim safety enhancement measures, plan to in-line inspect piggable pipelines and Valve Enhancement Plan, includes costs to replace pipeline segments to mitigate pre-1946 construction and manufacturing methods, proposed technology enhancements, and the development and design of an Enterprise Management System. Because the additional safety enhancement measures proposed in the Proposed Case will not yet have been approved by the Commission, SoCalGas and SDG&E propose to limit the scope of work during the one-year interim period to the "Base Case," excluding the costs associated with the Valve Enhancement Plan. The Base Case is limited to costs associated with a plan to test or replace pipeline segments that do not have sufficient documentation of pressure testing to meet the requirements set forth in D.11-06-017, proposed interim safety enhancement measures, in-line inspection of piggable pipelines and a Valve Enhancement Plan. See Testimony of SoCalGas and SDG&E, pp. 103-106. Proposed Valve Enhancement Plan costs are excluded from the scope of work during the interim period due to uncertainty regarding the scope of work that will ultimately be authorized by the Commission. Although specific valve enhancement projects are excluded in this scope of work planned during the oneyear interim period, prudent and economically efficient valve enhancement opportunities may be identified on pipelines being tested or replaced. Under such circumstances, SoCalGas and SDG&E will consult with Commission Staff before undertaking such valve projects pursuant to the monthly review process described below.

¹⁶ This timeline was based on an assumption that the Commission would authorize SoCalGas and SDG&E to begin initial planning and permitting work in 2011. See Testimony of SoCalGas and SDG&E in Support of Proposed Pipeline Safety Enhancement Plan, p. 28 ("In order to adhere to our proposed schedule, we must begin the work of planning and permitting individual pressure testing and replacement projects right away. Accordingly, SoCalGas and SDG&E urge the Commission to issue a decision authorizing us to begin executing our proposed Pipeline Safety Enhancement Plan as soon as possible.")

substantial, or pose significant environmental challenges that will require the engineering/design cycle to be initiated in order for the permitting process to begin.

SoCalGas and SDG&E propose to use this twelve-month period to mobilize the Program Management Organization, contract the Program Management Contractor, and advance the development of the program "baseline" including the preparation of program execution plans and procedures, scope of work, schedule, estimates, and risk management procedures. Effective completion of these activities will allow an effective transition once a final plan is approved, and provide SoCalGas and SDG&E with the greatest chance of success in meeting the four overarching objectives of the Pipeline Safety Enhancement Plan.

The schedule, estimated costs and scope of work set forth in the attached is based on a very high level analysis of the Phase 1A projects identified in the proposed Pipeline Safety Enhancement Plan. Once engineering, design, and execution planning work commences and the scope and dependencies for each individual project are better defined, new information will be available that will undoubtedly result in changes in the schedule for individual projects and may even lead to the addition or deletion of other projects. For example, since the filing of the proposed Pipeline Safety Enhancement Plan on August 26, 2011, the categorizations of some pipeline segments have changed as a result of the identification of additional documentation through our ongoing records review process and through our ongoing updates of pipeline class and HCA determination. Flexibility is therefore required when executing this work, and SoCalGas and SDG&E propose to review the scope of work, progress to-date, and actual costs incurred with the Commission's Consumer Protection and Safety Division (CPSD) and Energy Division Staff on a monthly basis during the twelve-month period, to keep Commission Staff apprised of potential changes as those changes are identified. SoCalGas and SDG&E further propose to notify the Commission, via Tier 1 advice letter filing, if our spending exceeds this preliminary cost estimate and we project that completion of the remaining scope of interim work will require us to exceed this estimate by greater than ten percent.

In Attachment B, SoCalGas and SDG&E supplement our Motion to Establish a Pipeline Safety and Reliability Memorandum Account to include an updated summary of the incremental costs expended in connection with the review of records and interim safety measures ordered by the Commission in

- 8 -

response to the National Transportation Safety Board's Safety Recommendations to PG&E and in D.11-06-017, and an updated forecast for the completion of the records review process in 2012 and the ongoing interim safety enhancement measures for 2012 through the first quarter of 2013. These additional costs proposed to be tracked in the memorandum account total approximately \$12 million for SoCalGas and \$1 million for SDG&E.

The revenue requirement associated with the forecasted incremental capital costs and the incremental O&M costs for the proposed scope of work contemplated in Attachment A, in addition to the incremental costs associated with the interim safety measures contemplated in Attachment B, will be captured in the memorandum account. The revenue requirement assumes all capital costs, including Allowance for Funds Used During Construction, are recovered through depreciation over the book-life of the assets once placed into service and the O&M costs are recovered in the period spent. In addition to the Capital and O&M costs, the revenue requirement includes all other expenses required to support the investment, including authorized rate of return on investment, income and property taxes, franchise fees, uncollectibles, and working cash associated with O&M.

IV. CONCLUSION

SoCalGas and SDG&E support transferring consideration of our proposed Pipeline Safety Enhancement Plan to the pending Triennial Cost Allocation Proceeding, provided that (1) such transfer does not result in undue delay of consideration of their Proposed Safety Enhancement Plan; and (2) the technical aspects or "substance" of the Pipeline Safety Enhancement Plan is considered along with the ratemaking aspects of the proposed plan. The schedule proposed above would facilitate timely consideration of the SoCalGas/SDG&E Pipeline Safety Enhancement Plan, whether consideration of the proposed plan takes place during a separate phase of the pending GRCs or as part of the Triennial Cost Allocation Proceeding.

In Attachment A, SoCalGas and SDG&E provide supplemental information regarding the costs we may incur during an interim twelve-month period if the Commission approves our request for authorization to establish a Pipeline Safety and Reliability Memorandum Account and authorizes us to begin work on our proposed Pipeline Safety Enhancement Plan. SoCalGas and SDG&E propose to review the scope of work, progress to-date and costs incurred with Commission Staff on a monthly basis

- 9 -

during this interim twelve-month period. SoCalGas and SDG&E further propose to notify the Commission, via Tier 1 advice letter filing, if our spending exceeds this preliminary cost estimate and we

project that completion of the remaining scope of interim work will require us to exceed this estimate by greater than ten percent.

Respectfully submitted,

By: <u>/s/ Deana Michelle Ng</u> Deana Michelle Ng

SDG&E

	2011 Actuals	2012 Forecast	2013 1st Quarter Forecast	Estimated Total Cost Through Q1 2013 (\$000)
Records Review (1)	\$717	\$550		\$1,267
Over Pressure Protection Equipment (2)	\$3			\$3
Leak Survey/ Pipeline Patrol (3)	\$8	\$20	\$5	\$33
Other Remediation (4)	\$1			\$1
Total	\$729	\$570	\$5	\$1,304

Notes

(1) - Validation of existing MAOPs pursuant to Resolution L-410

(2) - Validation of existing over-pressure protection set points and O&M associated with installation of equipment to facilitate pressure reductions on specific pipelines (includes temporary facility equipment installations that cannot be capitalized unless permanent)

(3) - Includes incremental costs to conduct additional bi-monthly leak surveys above current code requirements (such as overtime for existing employees or more frequent aerial surveys) and pipeline patrols on Category 4 segments identified

(4) - Includes incremental costs to cut out pipeline coupons and to test to determine pipeline

material properties that are used to determine MAOPs
