Subject: FW: CPUC visit Healy

Michelle,

Thanks for looking into the unplanned Healy Station visit. I am told that six folks arrived led by ALJ Koss (now of Risk Assessment?) -- see their business cards in the attached. They were very interested in the different valves, and impact of power outages and battery life on SCADA. They were also wanted to take pictures which our folks told them not to.

In the future, I hope we can coordinate this better so people onsite are not alarmed and so that we know these are not impersonators in secure areas. Would it help if we arranged a meeting with the Risk group so they know who to reach out to when they want to make a visit?

Thanks again,
Shilpa
