Subject: Fw: PG&E natural gas high pressure facility in Redacted

Richard

You may recall forwarding the emails below about 8 weeks ago. The PG&E team that is closer to Sacramento has provided this information, and it appears that we finally have gotten the right people together to get a clearer picture of the PG&E gas facilities that Captain Maccoun approached you about. My read on this is that the issue is positively resolved and that Sacramento fire, police and PG&E representatives now have appropriate contact names and info and better understanding of what is out there.

Just wanted you to be aware of this in case it was still on your "to do" list!  
Thanks  
Laura

**Subject:** Fw: PG&E natural gas high pressure facility in Redacted

In response to the email below, Corporate Security, Gas M&C, our Public Safety Specialist and Government Relations met with Captain Maccoun with Sacramento Police Department and representatives from the Sacramento Fire Department and a UASI (Urban Area Security Initiative) coordinator.

Corporate Security, Gas Engineering and Gas M&C met with members of the Sacramento Regional Office of Homeland Security January 2011 as well.

Captain Maccoun had some basic questions regarding the holder yard, which the team was able to address. In addition, our public safety specialist was able to provide information to the first

responders regarding upcoming workshops and how to utilize various resources that PG&E provides.

Sacramento PD has offered to provide additional safety resources to our yard, such as perimeter checks.

We will continue to provide ongoing outreach as necessary.

Thanks,

**Subject:** RE: PG&E natural gas high pressure facility in Redacted

Hi Laura: After talking with Jim Maccoun of the Sacramento Police Department on the phone today, he sent me the below email expressing his concerns that PG&E has not been adequately communicating with the Department about a PG&E gas facility in his area of command. Please have someone at PG&E who is knowledgeable about the site contact Mr. Maccoun as soon as possible and work with the Department to resolve his concerns.

Richard Myers, CPUC Energy Division.

PS: Jim, Laura Doll is Director of Regulatory Relations at PG&E.

Mr Myers,

I am the area commander for the North Command for the Sacramento Police Department. PG&E has a large (15-20 acre) underground storage/pressurization facility in a residential area within my area of command. Last year, following a consultant's report, the Twin Rivers Unified School District felt this facility was enough of a potential risk that they permanently closed a nearby elementary school. This raised our awareness and we requested that PG&E provide some clear signage that would assist first responders, brief us on security measures (alarms/ communication protocols) and insure that simple direction/coordination for City of Sacramento first responders was given. The area in question is a high crime area and very prone to crimes involving metal theft. For several months we have received email communication indicating that something would happen, yet nothing responsive has occurred. We did have some additional concerns when PG&E moved heavy equipment from a contractor onto the property a few weeks ago and they did respond to that inquiry and advised that it was routine 10 year maintenance.

Yesterday (12-15-11) I was driving by the site and observed a fencing contractor who informed me that PG&E had summoned them because of cuts/intrusion into the facility. We have received no notification from PG&E of this activity. The Sacramento Police Department has experienced a 29% reduction in staffing due to budget cuts and certainly can not insure the safety and security of this site. However, we wish to work with PG&E on this issue of mutual concern. I have copied Lt. James Hendrickson of our Homeland Security division as his group has been involved in these past efforts at communication and his group has trained evaluators who can make recommendations regarding the security needs of this facility in keeping with the ACAMS program. SPD can also coordinate discussion or briefing with the Sacramento Fire Department as well.

Thank you in advance for your assistance in this matter,

James Maccoun, Captain

William J. Kinney Police Facility
